Product Information

Lamb Maker™ Protein Pressed Blocks deliver high quality, plant-based protein in addition to a high quality mineral and vitamin package designed to promote health and well-being for your sheep through proper nutrition. In addition to highly bioavailable organic minerals, this block contains added Actigen® for improved gut health during stressful periods. This small block size is ideal for lactating ewes and growing lambs because lambs are unlikely to sleep or play on the blocks.

- Designed especially for the nutritional needs of sheep to promote health and well-being through proper nutrition
- Delivers high quality, plant-based protein during times of low forage quantity or quality
- High quality nutritional package, including organic minerals from Bioplex® Zinc for improved bioavailability
- Added Actigen® for improved gut health during stressful periods
- Highly palatable formula designed to keep sheep coming back for more
- Conveniently sized, 25-lb pressed block is easily transported
- Small size means that lambs are less likely to soil the block due to lying on it

Feeding Instructions

CAUTION: USE AS DIRECTED. Consumption of selenium should not exceed 0.7 mg per head daily.

Introductory Period: Following a 7 to 10 day acclimation period, average consumption should be 2 to 4 ounces for sheep and goats with unrestricted forage supplies. Position the blocks 50 to 75 feet from loafing, feeding and watering areas. Some repositioning of blocks may be necessary as animals become acclimated to the presence of the blocks. Move blocks closer to increase consumption; further away to decrease consumption. If overconsumption occurs for more than two weeks and repositioning of blocks does not correct the situation, remove blocks and evaluate the overall feeding program. **DO NOT ALLOW STARVED ANIMALS FREE ACCESS TO THIS BLOCK.**

Feeding Recommendations:

1. Feed at a rate of one block per 5 to 10 head. All animals should have equal access to blocks. Timid and smaller animals need their share.
2. Place blocks where animals congregate. Locate blocks throughout the pasture at loafing, grazing and watering areas. Adequate distance must be maintained between blocks to prevent crowding - 10 feet minimum.
3. Feed blocks continuously along with plentiful sources of forage and clean, fresh water. Animals should not run out of blocks. When a block is two-thirds consumed, provide a new block near it. Place very small pieces in a feed pan or trough to be cleaned up.
4. Sheep and goats should consume an average of 2 to 4 ounces per head daily.
5. Consumption of this block may vary depending upon animal body condition, quality and quantity of forages, seasonal weather conditions, and most importantly, feeding
